

I strongly urge rejection of NAB's petition 04-160. As a daily commuter who spends up to two hours a day in my car, I value variety and the right to listen to many voices. The local traffic has been very helpful. XM provides an important service to me and has improved my ability to stay informed as well as entertained. It provides service and quality unavailable through regular broadcasts.

As was true with Cable and satellite TV, XM provides a much needed alternative to the big broadcast radio syndicates, such as Clear Channel, who try to monopolize the airwaves and limit free speech.

Please support XM and Sirius and keep satellite radio available as a option for those who want variety and quality.
